FOR NICKEL PLATING ADD 2/- PER DOZEN YARDS TO THE LIST PRICE.

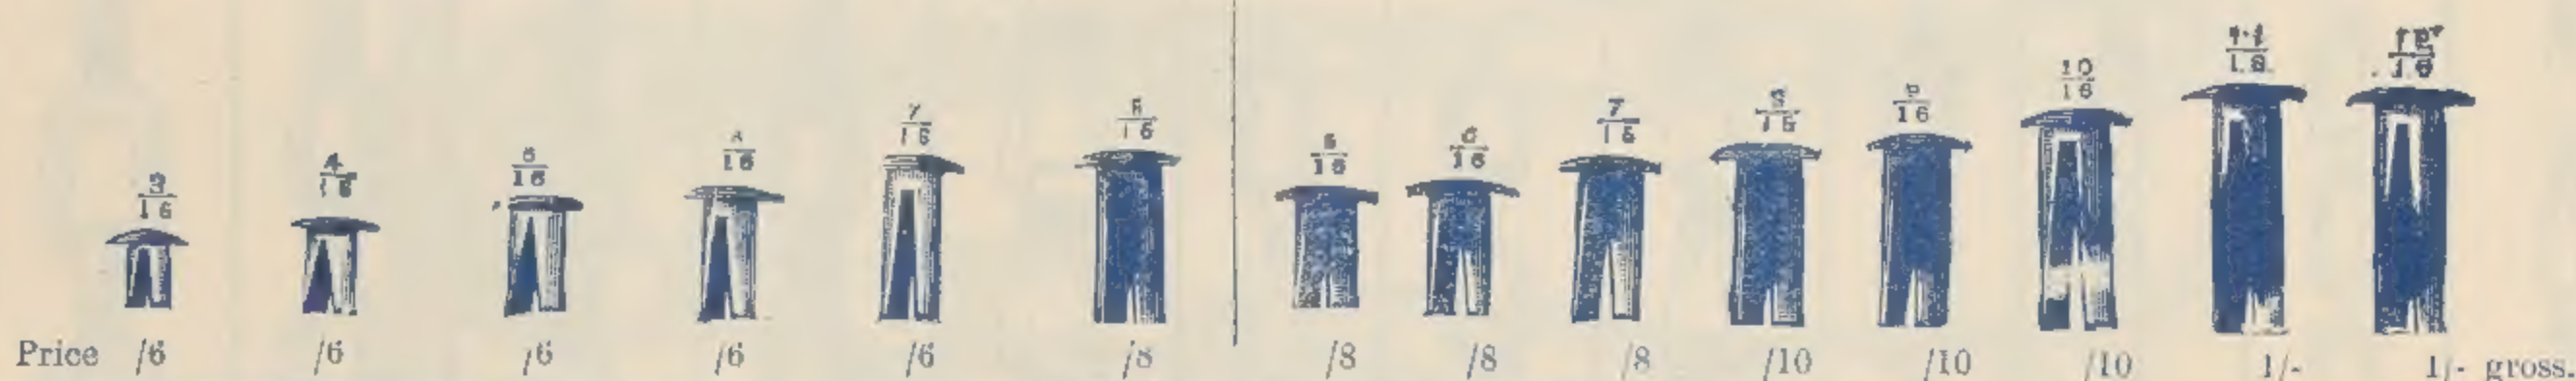

The Letter refers to the shape and size of the Link, and the last number to the thickness or gauge, and where double numbers are used, the first number refers to the width—E15 to E18 are all the same size of link but different gauges, while E25 to E28 are the same as E15 to E18 but wider.

**DOG, HALTER AND SCAFFOLD CHAINS, GOW TIES, &c.****For JACK CHAIN, POT HANGERS, S HOOKS, apply to BODILL PARKER & Co. Ltd.**

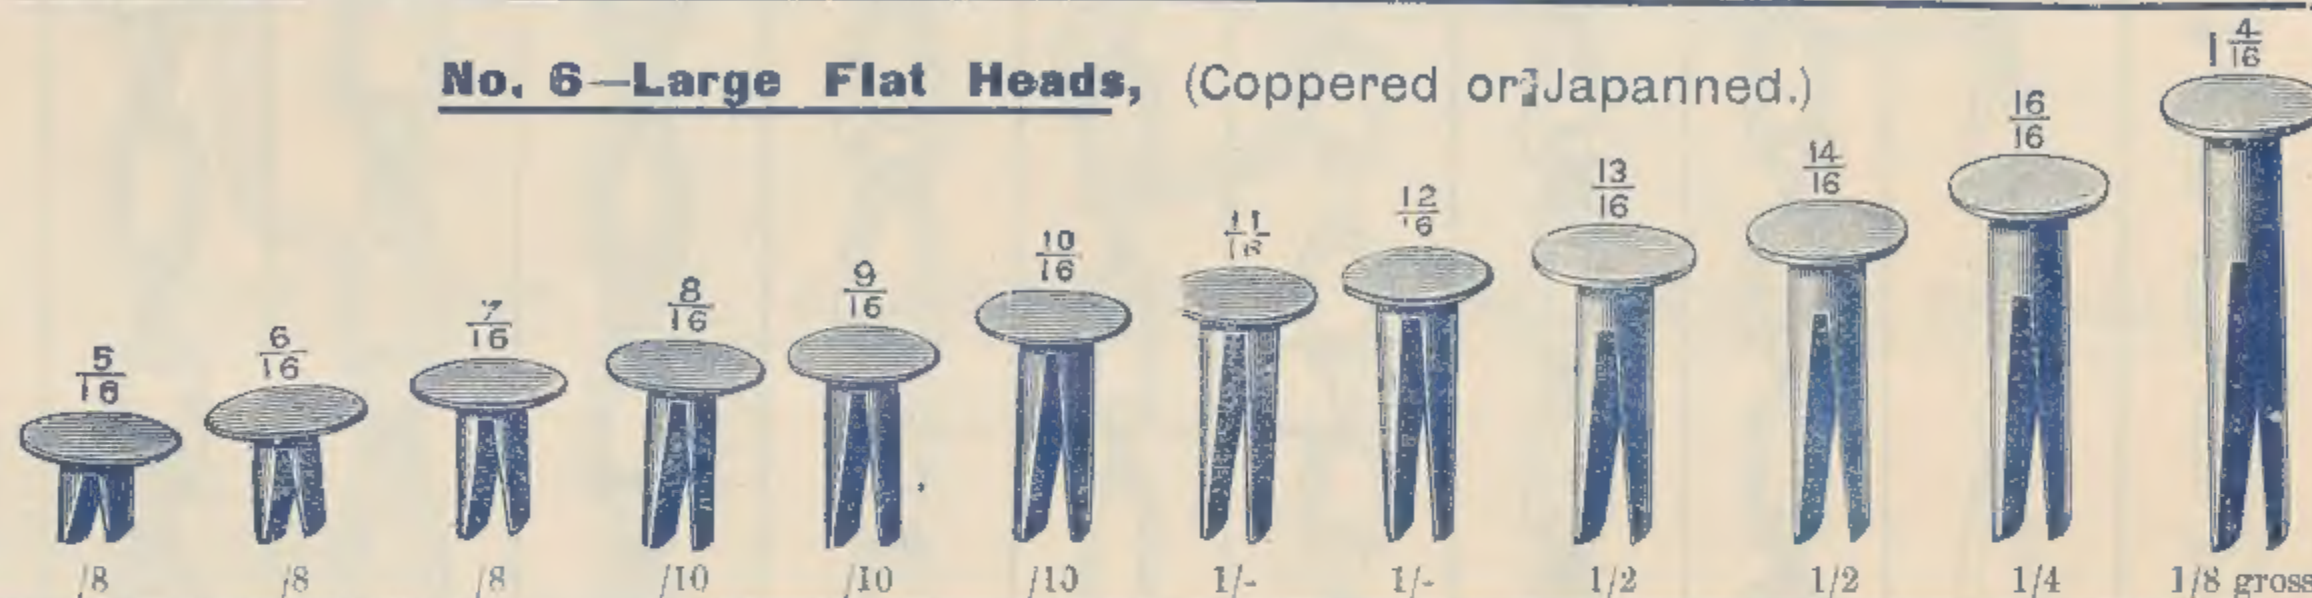

# Bifurcated or Slotted Rivets for Making and Repairing Leather Goods, (Bags, Belts, Harness, Straps, Trunks, etc.)

**No. 9—For Light Work** (Coppered or Japanned).

**No. 6—Ordinary** (Coppered or Japanned.)

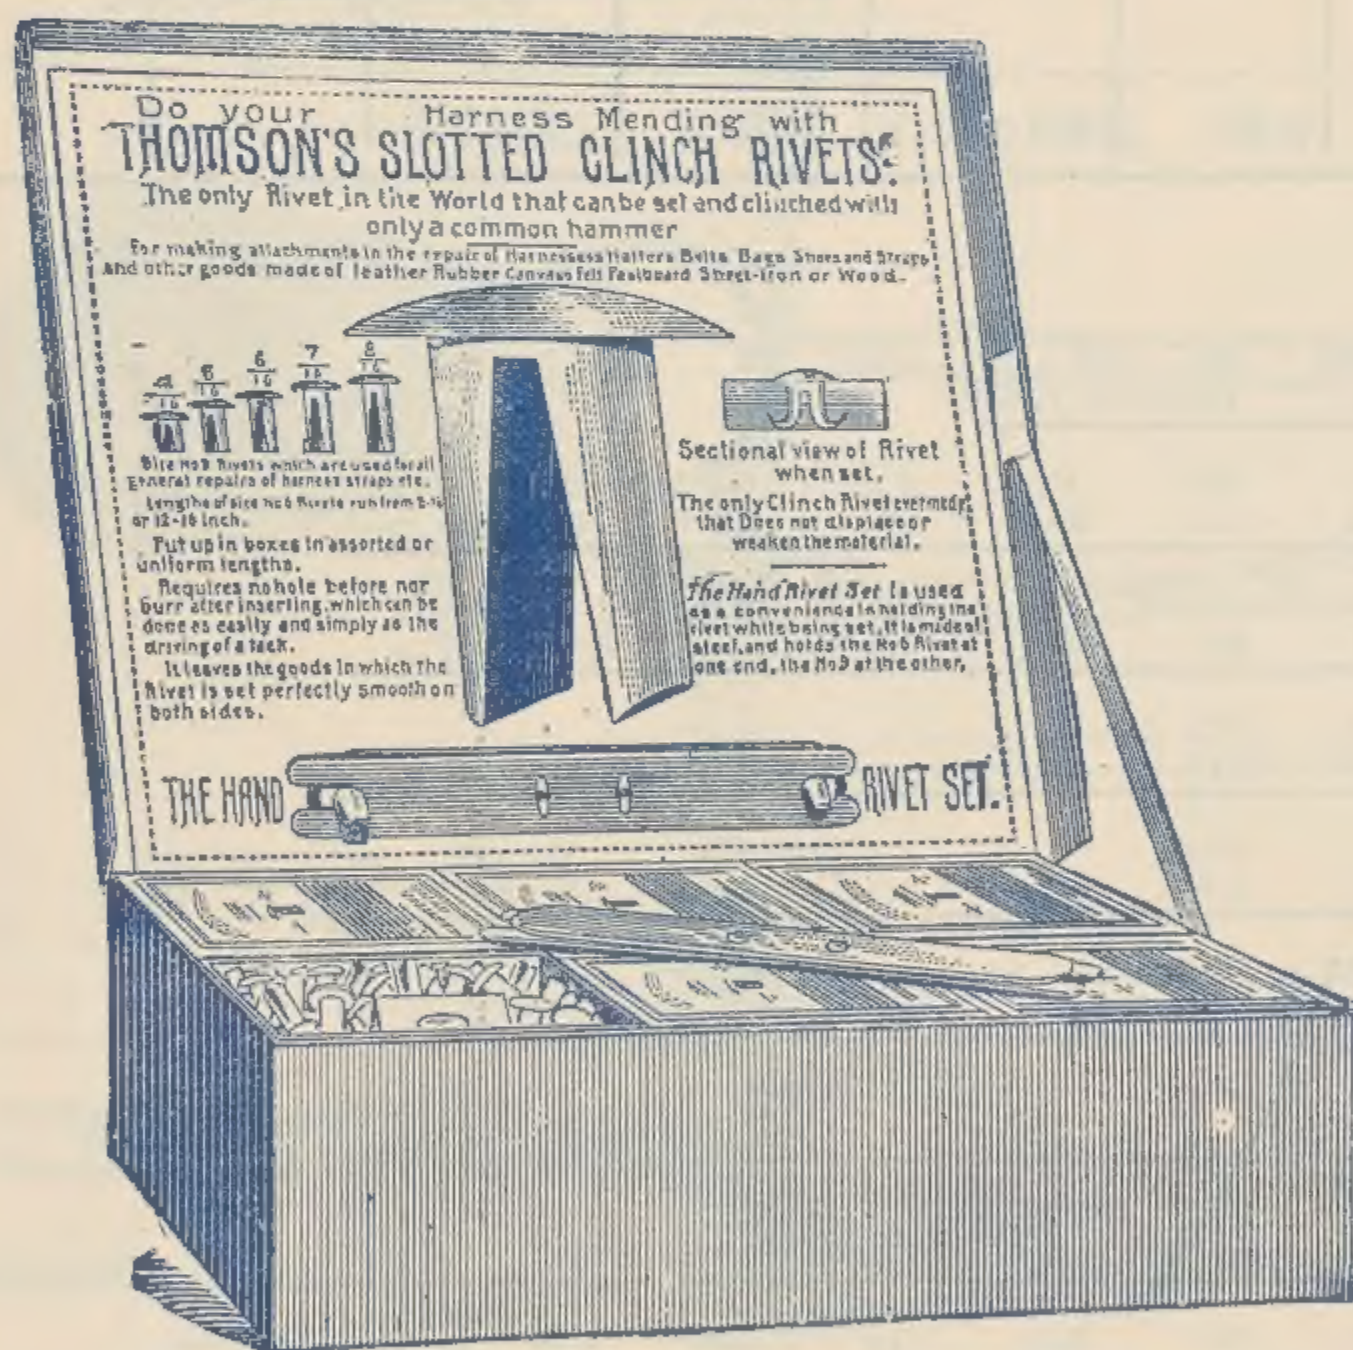

**No. 6—Large Flat Heads,** (Coppered or Japanned.)

One gross of assorted Rivets with Hand Tool, 1s. nett.

A case containing 12 boxes.

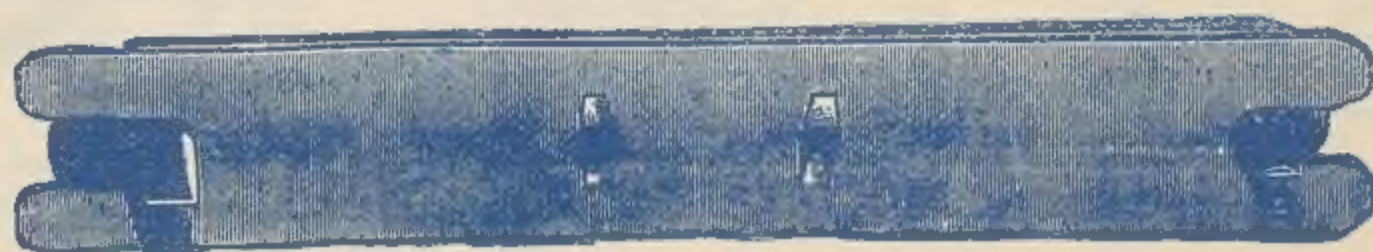

A case containing 4 gross No. 9, and 8 gross No. 6 Ordinary (Coppered or Japanned) and two hand tools for 8/4 nett.

**COUNTER MACHINE FOR RIVET SETTING.**

Price, 17/6 nett.

**Patent Hand Tool, 2/- per dozen.**

SECTIONAL VIEW WHEN SET.

**Directions for Driving and Clinching with Hammer.**

Insert rivet in hand tool, as shown, drive the rivet through the material into a board, or the end of a block of wood is better which will receive tips of the prongs. Turn the material over, rest the head of rivet on a smooth iron or solid surface, spread the prongs and hammer flat. Care should be taken to select rivets to suit thickness of goods to be mended. A rivet a sixteenth longer than thickness of material for hard leather and an eighth for spongy leather will give good results.
